SIMPLE
DURABLE

EASY-
RUNNING

CAPACITY **Market Wheat, 40 Bushels per Hour**
Clover Seed, 12 Bushels per Hour

This Cleaner is adaptable for cleaning all kinds of grain or seeds, such as wheat, oats, corn, barley, rye, buckwheat, alfalfa, timothy, clover, flax, and all other seeds or grain, and is suitable for farm or general use.

The Clipper is especially adapted for making effectual separation of wild oats, cheat, cockle, and all foreign seed from wheat and oats, as well as cleaning the perfect seed.

Other manufactures depend entirely upon screens for this work, and with unsatisfactory results. **The Clipper,** however, screens all straw and foreign matter from the grain before it enters the air shaft, and our **"Vertical Blast" does the rest.** Our screens are so arranged as to be in plain view and of easy access to the operator while the machine is in operation.

TRADE ANNOUNCEMENT

Prices herein given will be adhered to as nearly as possible during the season; but it must be understood that I am not bound by them for any definite time or quantity, and that they are subject to advance without notice.

In case there should be a reduction in any article from prices herein given, my customers will receive the benefit of such reduced price, notwithstanding the prices named in this list.

Buyers of small amounts of cheap articles, or of quantities of less than a pound of any one kind, must expect to pay a small advance on these prices.

I beg once more to call the attention of dealers to the fact that my goods are the best of the kind that can be procured, and request my customers not to confound them with the various cheap articles often found in this market. Notwithstanding this, however, I, in common with all large dealers of character and standing, do not warrant my seeds in any particular whatever. If the purchaser does not accept them on these terms, they must be returned at once.

Bay View Musk Melon.
